

BE Holiday Pay Procedure (version 4)

Double holiday pay equals 92% of the gross monthly salary for a full-time employee, paid once per year in May or June. For part-time employees it is calculated pro rata to the average occupation fraction during the qualifying year (the calendar year before the holiday is taken).

When an employee leaves mid-year, the employer settles departure holiday pay covering vested rights from the previous qualifying year (N-1) plus the current year's accrual up to the leaving date, at 7.67% of the relevant gross earnings, adjusted by the part-time fraction.
